

STANDARD TEST GAUGES

Our Hire Department has a large stock inventory of Standard Test Gauges, ranging from 2bar up to 2000bar. These gauges are available in dual scale psi and bar readings with an accuracy of X 0.25%.

All our gauges are packed in their own individual transit case and are supplied with a cross over adapter to ½" NPT Male.

Our gauges are individually calibrated and have a unique serial number printed on the dial. A test certificate traceable to national standards is supplied with every calibrated gauge.
